ADAPTATION FUND

Approval of request for revision of project results framework: World Food Programme (India, Sri Lanka)

Weight of request: Minor

Summary of request

On 1 September 2026, the World Food Programme (WFP) submitted a request to revise the results framework for the project "Strengthening Resilience of Vulnerable Communities in Sri Lanka and India to Increased Impacts of Climate Change" implemented in India and Sri Lanka. According to the letter submitted by WFP, the request stems from the finalization of previously pending figures and minor correction. More specifically, WFP proposes to: i) correct a typographical error in the number of direct beneficiaries under Indicator I.1, where the number of indirect beneficiaries was previously used, and align the unit of measurement under Indicator 2.2(b), where households were previously reported instead of community members, with the estimates presented on pages 177-179 of the approved project document; ii) clarify the wording of the targets for Indicators I.3 and 2.1.2(a), without changing the underlying target values; iii) finalize and incorporate target values that were indicated as "to be determined" or "to be confirmed" at the time of approval; and (iv) refine the sources of verification for selected indicators to improve measurability and ensure consistency with the project's implementation and reporting arrangements.

Secretariat's review of the request

The secretariat has reviewed the request and the reasons provided by WFP and considers the request to be justified. The proposed revision of the project results framework does not constitute a change in scope that would result in a significant deviation from the project's expected adaptation outcomes and goals and is therefore considered a minor change.

The secretariat acknowledges that the Designated Authorities have submitted letters endorsing the proposed revisions, that the Implementing Entity has submitted a letter providing background and explanatory information, together with a revised fully developed project document in track changes reflecting all modifications induced by the proposed revision in project results framework, in line with the Fund's Policy on Project Post-Approval Requests for Changes in Projects/Programmes.

Conclusion

Following the review of the request for revision of project results framework, submitted by WFP for the project "Strengthening Resilience of Vulnerable Communities in Sri Lanka and India to Increased Impacts of Climate Change" implemented in India and Sri Lanka, the request has been cleared by the Secretariat as per Decision B.44/44 and the Policy on Project Post-Approval Requests for Changes (Amended, 2025).
