3. Asset Mix and Investment Income

ASSET MIX

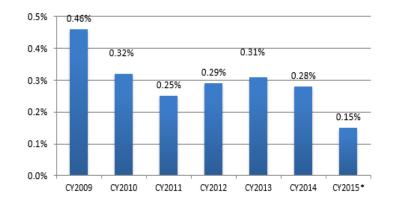

The undisbursed cash balance of the Adaptation Fund Trust Fund is maintained in a commingled investment portfolio ("Pool") for all trust funds managed by IBRD. The Pool is actively managed so that the probability of incurring negative returns is no more than 1% over the applicable investment horizon. Pursuant to the Report of the 17th meeting of the AF Board, dated April 16, 2012, the Trust Fund balance has been allocated to a longer term investment portfolio in accordance with the Trustee's procedures for trust fund investments.

The portfolio allocation by asset class has the largest allocations to government securities and money-market instruments. In 2012, the Adaptation Fund Board approved an updated investment strategy, reflecting the Fund's mandate, current risk profile and projected liquidity needs.

INVESTMENT RETURNS

Fixed income yields remain at very low levels. Contributors to performance were Government Securities, Agency MBS, the LIBOR portfolio, corporates, sovereign bonds in the United States and Europe.
