

ADAPTATION FUND

# 2016 Photo Contest

#AFphotocontest

**THEME:** Adapting Coasts and Inland Watersheds to the Effects of Climate Change

Coastal areas and inland river watersheds are under increasing pressure from climate change-related droughts, extreme rainfall variability, sea-level rise, floods, erosion and storm intensification. The Adaptation Fund's Photo Contest encourages people to depict the effects of climate change and adaptation actions already taking place or that are urgently needed on coasts and inland watersheds. What do coasts and watersheds mean to you? How does climate change affect these natural environments and people's lives and livelihoods?

**Tell this story in pictures – and submit them to us at [AFBSEC@adaptation-fund.org](mailto:AFBSEC@adaptation-fund.org) by **June 3, 2016**.**

**Winners will be selected by a diverse jury with experience in climate adaptation projects in countries and photography. Separate People's Champions will also be selected through an open vote on Adaptation Fund's Facebook page.**

**INSTRUCTIONS & CRITERIA:** [www.adaptation-fund.org/photocontest2016](http://www.adaptation-fund.org/photocontest2016)
