## HIGHLIGHTS FOR THE PERIOD APRIL 1, 2016 THROUGH JUNE 30, 2016:

- EUR 1 million from Walloon Region was received by the Trustee in June 2016.

### 3. Asset Mix and Investment Income

#### ASSET MIX

The undisbursed cash balance of the Adaptation Fund Trust Fund is maintained in a commingled investment portfolio (“Pool”) for all trust funds managed by IBRD. Funds are managed such that the expected maximum loss, as measured by the CVaR, in the worst 1% of cases will not exceed 0.25% at the portfolio’s investment horizon. Pursuant to the Report of the 17<sup>th</sup> meeting of the AF Board, dated April 16, 2012, the Trust Fund balance has been allocated to a longer term investment portfolio in accordance with the Trustee’s procedures for trust fund investments

The portfolio allocation by asset class has the largest allocations to government securities and money-market instruments. In 2012, the Adaptation Fund Board approved an updated investment strategy, reflecting the Fund’s mandate, current risk profile and projected liquidity needs.

*Note: The negative position in swaps is primarily due to changes in foreign currency exchange (FX) rates in cross currency swaps, which are used to implement currency hedges on bond positions within the portfolio. At the expiration of trustee instruments, the net allocation would be zero.*

#### INVESTMENT RETURNS

The portfolio’s investment performance continues to be modest as fixed income yields tested new lows again in June 2016. The largest contributor to investment performance over the quarter, as well as over FY16, was medium-term sovereign bonds in the United States.
