NAP-GSP

NATIONAL ADAPTATION PLAN GLOBAL SUPPORT PROGRAMME

Support to Developing Countries

Program institutional arrangements

UNDP/UN Environment NAP-GSP: Overview and project milestones

2013-2015

NAP-GSP Support for LDCs
USD 2 million from the LDCF
Supporting LDCs on NAP Processes

2015-2018

NAP-GSP for non-LDCs
USD 4.5 million from SCCF
Programme expanded to assist non-LDCs with
NAP processes

2016-2019

NAP-GSP for LDCs (expanded)
USD 6 million from LDCF
To expand support towards building technical
capacity of LDCs

What does the NAP-GSP do?

Programme Objective: To strengthen institutional and technical capacities for iterative development of comprehensive NAPs.

Supports requesting countries with one-on-one technical assistance on demand to get started on the NAP process

Sensitizes national teams on tools to support key steps of the NAP process through regional trainings

Facilitates exchange of lessons and knowledge through South-South and North-South cooperation

UNDP/UN Environment NAP-GSP: Key achievements

Seven Regional Training Workshops in Africa, Eastern Europe and Central Asia, Asia & Pacific and Latin America

Training assistance provided to **96 countries globally**

Total of more than 260 people participated in Regional Training Workshops from Ministries of Environment, Planning and Finance

Country missions to 32 countries across Asia & Pacific, Latin America, Africa, Eastern Europe and Central Asia

Partnerships forged and **knowledge networks strengthened** – including APAN, AAKNet, REGATTA

'Peer-to-Peer Buddy System' forged for enhancing south-south knowledge exchange in Africa, Asia & Pacific and Latin America

PLANNED SUPPORT ACTIVITIES, 2017 & 2018

*Countries are further capacitated to
advance medium to
long-term adaptation planning processes
in the context of their national
development strategies and budgets*

Outcome

1

Developing countries have capacity to advanced medium to long-term adaptation planning processes in the context of their national development strategies and budgets (UNDP)

Outcome 1

Technical support (country-level)

Target: 20 non-LDCs and 20 LDCs receive tailored support to advance their NAP process

Target: Access to GCF NAP support facilitated

Outcome

2

Technical capacity to support key steps of the National Adaptation Plan process is developed and relevant tools and methods are accessible to all developing countries.

(UN Environment)

Outcome 2

Technical support (regional trainings)

Target: 10 regional workshops for non-LDCs and 6 targeted workshops for LDCs

Target: At least 300 national technicians from non-LDCs and 144 from LDCs trained in the use of tools and methods to advance the NAP process (at least 30%-40% women).

Target: At least 5 training materials for non-LDCs and 2 for LDCs developed and published online.

Outcome 3

Lessons and knowledge sharing through South-South and North-South cooperation to enhance international and regional cooperation to formulate and advance NAP process.
(UNDP and UNEP)

Outcome 3 Knowledge brokering

Target: Documentation of NAP process of at least 20 LDCs that received one-on-one support

Target: Case studies and analyses on integrating NAPs, NDCs, and SDG outcomes

Target: Undertake needs/gap assessments continually, preferably with LEG

Target: share result of analysis and best practices through at least 6 knowledge- sharing systems/platforms

Significance of Developing a NAP

- **comprehensive on content, capacities(human, institutional, systemic), identification of steps for implementation**
- **helps identify adaption priorities and options**
- **enables linking to financing/budgeting and long-term development planning and priorities**
- **iterative process**

Challenges and Solutions

Challenges:

- capacity needs evolve overtime
- institutionalizing capacity
- lack of coordination between various planning frameworks further burden limited capacity
- financing for:
 - (a) technical assistance to formulate NAP
 - (b) support follow-up formulation and implement NAP
 - (c) develop investment-ready projects

Solutions:

- training modules/tools on finance, prioritization of options, sectoral approaches
- data and climate information: initiatives engaging the insurance industry
- situate small capacity building initiatives in transformational context, linking to long-term development planning and priorities
- adopt a continuum approach from planning, to developing implementation strategy, to large-scale programming
- facilitate coherence and integrated approach between planning frameworks (e.g. NAPs, NDCs, and SDGs)
- facilitate peer-to-peer exchange
- exploring ways to empower direct access entities

Preparing at national level to access finance

- Involve of finance ministries
- Cost out actions
- Develop NAP funding strategies (preferably along with other funding strategies such as SDGs)
- Review the climate finance landscape (tool, CPEIR)
- Exploring possibilities for blending public, private, international sources
- Incentivizing private investment

Available support (technical and financial)

- LEG and LEG secretariat
- LDCF, SCCF through NAP GSP
- LDCF, SCCF directly supporting countries
- GCF Readiness window NAP allocation (up to \$3 million)
- Bilateral/development agencies support (e.g. GIZ)
- Domestic
- NAP Global Network
- Adaptation programming such as AF, GCF, GFF
