- EUR 3.25 million from Walloon Region was received by the Trustee in April 2017.

3. Asset Mix and Investment Income

ASSET MIX

The undisbursed cash balance of the Adaptation Fund Trust Fund is maintained in a commingled investment portfolio (“Pool”) for all trust funds managed by IBRD. Funds are managed such that the expected maximum loss, as measured by the CVaR, in the worst 1% of cases will not exceed 0.25% at the portfolio’s investment horizon.

The portfolio allocation by asset class has the largest allocations to government securities and money-market instruments.

Note: The negative position in swaps is primarily due to changes in foreign currency exchange (FX) rates in cross currency basis swaps. Such swap instruments are used to implement currency hedges on bond positions within the portfolio. These hedges remain in place.

INVESTMENT RETURNS

The AF Trust Fund liquid portfolio earned approximately USD 9.28 million in investment income since inception. The portfolio return during the first two quarters of calendar year 2017 was 0.58%, with the largest contributors to investment performance being money market instruments and sovereign bonds.
