ADAPTATION FUND

Environmental, Social and Gender Requirements

1. E&S Policy
and 15
Principles
(OPG Annex 3)

2. Gender Policy
and Action Plan
(OPG Annex 4)

Guidance
Document for
Implementing the
E&S Policy

Guidance
Document for
Implementing the
Gender Policy

15 E&S Principles

- Technical requirements
- Outcomes based
- Provide risk mgmt
- Focused on the 15 greatest risks

THE ENVIRONMENTAL AND SOCIAL POLICY & GENDER POLICY

Group Tasks:

1. Identify the environmental and social risks associated with the project components
1. Justify your conclusion for each principle

Spanish Table - ESP 1 to 5

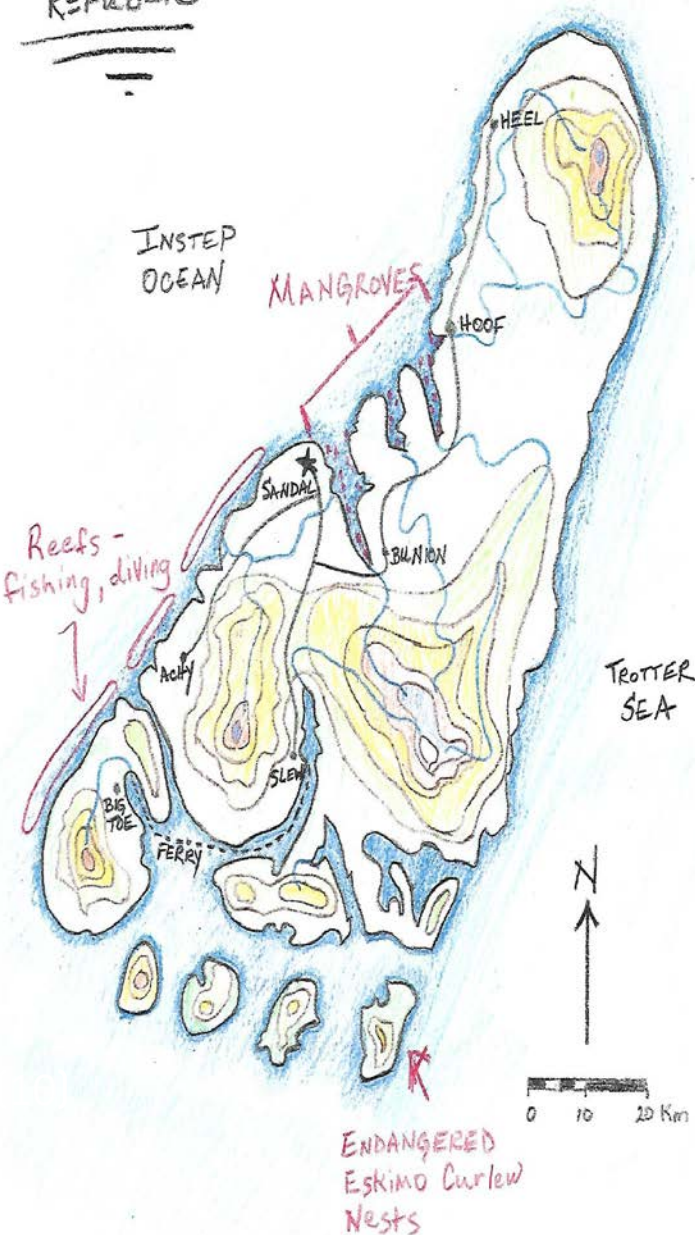

English Table - ESP 6-10

French Table - ESP 11-15

Project Components

Location	Activity	Cost
1. Achy	Conduct an economic study of the benefits of building a fish processing facility at Achy, that is largely operated by women of Achy.	\$100,000
2. Heel, Hoof & Bunion	Install rainwater catchment systems on houses and building; install water storage areas.	\$1,800,000
3. Slew	Pilot program to improve farming practices and restore deforested areas.	\$2,500,000

BAREFOOT REPUBLIC

Community	Overview
Sandal	<ul style="list-style-type: none"> Capital city; biggest population center Large disparities in wealth creating tension; large % of poor are in poor health; mixed ethnicities Trade, tourism, farming and banking
Achy	<ul style="list-style-type: none"> Primarily fisherman; men frequently away fishing Fairly healthy; speak unique dialect Difficulties in preserving fish and getting it to market
Slew	<ul style="list-style-type: none"> Large family groups inter-married with Big Toe people as some go to Big Toe for work Farmers; land is poor so have to keep expanding by moving up the mountain side and clearing trees
Big Toe	<ul style="list-style-type: none"> Developed as a 5-star luxury tourism area; feel strong support from Sandal All jobs related to tourism; health is good
Bunion, Hoof & Heel	<ul style="list-style-type: none"> Farmers and fishers; road is very poor so little mixing; Health is poor; communities feel ignored by Sandal

The background of the slide features a photograph of a rural landscape. In the foreground, there are several small, simple houses with blue corrugated metal roofs. The houses are built with light-colored walls, possibly mud-brick or plaster. Behind the houses, there is a green field, and in the distance, a range of mountains is visible under a hazy sky. The overall tone of the image is warm and slightly desaturated.

1: Compliance with the Law

2: Access & Equity

- Fair and equitable access to benefits
- Don't impede access to services
- Don't exacerbate inequities

3. Marginalized & Vulnerable

- Impacts should not be disproportionate
- Groups excluded from normal economic/social fabric
- Limited capacity to withstand impacts

4. Human Rights

- Respect and where applicable, promote international human rights

5. Gender Equity & Women's Empowerment*

Women and men:

- Have equal opportunity to participate
- Receive comparable social and economic benefits
- Do not suffer disproportionate adverse effects

* Supports & compliments the Gender Policy

Gender Policy Actions:

Institutional Level, IE must:

- Document institutional capacity & commitment to implement AF Gender Policy

Project Level, IE must:

- Conduct a gender assessment
- Select gender-responsive indicators
- Design gender-responsive implementation and monitoring
- Conduct consultation
- Develop a grievance mechanism

6. ILO Core Labor Rights

- Freedom of association & collective bargaining
- Elimination of forced labor
- Elimination of worst forms of child labor
- Non-discrimination

7. Indigenous Peoples

- Consistent with the UN Declaration of the Rights of Indigenous People

The Taino Indians
Native Americans of the Caribbean

8. Involuntary Resettlement

- Avoid, minimize displacement
- If limited resettlement is unavoidable, minimize impacts and ensure fair and adequate compensation

An aerial photograph of a winding river or stream flowing through a dense, green landscape. The river meanders through the terrain, creating a series of loops and curves. The vegetation appears to be a mix of grasses and shrubs, with varying shades of green. The overall scene is a natural, undisturbed habitat.

9: Protection of Natural Habitats

- Avoid conversion or degradation of critical natural habitat

10: Conservation of Biodiversity

- Avoid loss of biodiversity
- Avoid introduction of invasive species

11: Climate Change

- No significant increase in GHGs

12: Pollution prevention and Resource Efficiency

- Maximize energy efficiency
- Minimize material use, pollution and waste

13: Public Health

- Avoid negative health impacts

14: Physical and Cultural Heritage

- Avoid negative impacts to cultural heritage

15: Lands and Soil Conservation

- Promote soil conservation
- Avoid degradation or conversion of productive lands or lands that provide valuable ecosystem services

E&S Management Plan

- **Plan that captures the actions identified to manage risks and impacts**
- **Integrate ESMP into operations and not stand-alone**
- **Update ESMP with results of on-going monitoring**
- **Commitment to implement is a condition of AF approval**
- **Include results in reporting to AF**

Monitoring & Reporting

- **Commensurate with risks and impacts**
- **Related to ESMS**
- **Informed by consultations**
- **Results of monitoring should inform future**
- **Report annually to AF**
