

# Climate Adaptation Finance:

# DIRECT ACCESS

The Adaptation Fund's pioneering and robust direct access modality was the first of this kind to be fully operational among climate funds. Through direct access,

accredited National Implementing Entities (NIEs) are able to directly access financing and manage all aspects of climate adaptation and resilience projects, from design through implementation and monitoring.

South Africa, South African National Biodiversity Institute

"Direct access provides developing countries with the opportunity to strengthen local capacity and to build on local expertise"  
—Fundcooperación para el Desarrollo Sostenible (Costa Rica's NIE)

## benefits OF DIRECT ACCESS

- Funds projects directly managed and led by countries
- Elevates issues relating to climate change and adaptation to the national level
- Improves intragovernmental collaboration and amplifies stakeholder voices
- Fosters transparency, inclusiveness and competition in project formulation
- Sustains institutional knowledge and enhances internal management
- Empowers developing countries to build national adaptive capacities

Argentina, Unit for Rural Change

All developing country Parties to the Kyoto Protocol are eligible to nominate an entity for accreditation. Once an entity passes the Fund's rigorous accreditation review, it may apply for project funding.

- Accredited implementing entities:**
- Are fully responsible for project & programme management, including financial, monitoring and reporting
  - Receive funding in performance-based tranches

### The Adaptation Fund's readiness programme is helping implementing entities:

- Efficiently navigate the accreditation process
- Strengthen their capacity to design and implement climate adaptation projects and programmes
- Build capacity and share lessons through workshops, webinars and readiness grants, including south-south cooperation, and technical assistance

# Climate Adaptation Finance: **DIRECT ACCESS**

Jordan, Ministry of Planning and International Cooperation

'The projects are localized. It's about making a difference on the ground. They are replicable, scalable and it's also about catalyzing much bigger things. It enables local actors and can be transformational.'  
— South African National Biodiversity Institute

'This programme made measurable impact. It improved local capacity, reduced vulnerabilities, fostered community empowerment, increased awareness of the environment and climate change and built more climate resilient communities.'  
— Planning Institute of Jamaica
