

# GOJ/Adaptation Fund Programme

Building the Resilience of the Agriculture  
Sector and Coastal Areas

**BREAKING THE TIDE, RENEWING THE LAND**

## Adaptation Fund Readiness Webinar #8

### Knowledge Management Systems for Climate Adaptation

### PIOJ's Experience

Presented by  
**Shelia McDonald-Miller**  
Programme Manager (GOJ/AFP)  
Planning Institute of Jamaica

# Knowledge Management Systems for Climate Adaptation

**What kind of KM systems are in place?; experience putting them together/maintaining them.**

- There has been growing awareness / appreciation of the need to integrate KM.
- KM systems operate within the wider framework of Institute's policy guidelines
  - PIOJ has business process manual; communication policy/guidelines
- The role of the NIE in KM is to (a) compile data/generate lessons learnt during implementation phase of the programme cycle, and (b) to share the information with relevant stakeholders (locally and globally)
- Currently, a **tiered system** of KM exists:
  - Between the NIE and EE/MDAs
  - NIE and target communities/direct beneficiaries
  - NIE and wider public

# Knowledge Management Systems

- **What KM products have been developed; how do you identify which products to produce?**
- Website-- <http://adaptja.pioj.gov.jm/>
- Story Map  
<http://goj.maps.arcgis.com/apps/MapJournal/index.html?appid=a5b2b62d408142609044ed0a57207cd2>
- Risk Atlas; Land Husbandry Manual; brochures, fact sheets; project videos/stories; PPR; Mid-Term Evaluation Reports
- **Identification of which products to produce:**
  - Products should have relevance to their target audience;
  - NIE has to be responsive to stakeholders, therefore, different focus for different groups (eg. Youth brochure vs. corporate brochure)
  - Utilize existing technology: eg videos to capture /disseminate achievements and on-the-ground happenings.

# Knowledge Management Systems

- **Storage and Access of Information**
- Central documentation centre (library)
- Storage media and Reports/documents (PMU access)
- Website
- Improve visibility and communication with stakeholders
  - Roll-out of Strategy and Action Plan

# Knowledge Management Systems

- **Sharing KM Information: How and to Whom?**  
**Diverse range of stakeholders**
- Internally – intranet; central documentation centre (library); Programme Management Unit
- Inter-agency – PSC meetings; PMG; EE and Partners
  - Share information as well as physical distribution
- Media Engagement (JIS Think Tank; outside broadcasts, etc.)
- Generally public (website; reporting to donor; participation in seminars, webinars, partner events)

# Thank You!
