

ADAPTATION FUND

AFB/B.35.a-35.b/15
24 July 2020

Adaptation Fund Board

**PROCESS *AD INTERIM* TO CONSIDER FIRST SUBMISSION
PROPOSALS AND SMALL GRANT PROPOSALS IN AN
INTERSESSIONAL PROJECT REVIEW CYCLE**

Introduction

1. The rationale behind the intersessional review process is reflected in the Board decision B.22/15, where, following the conclusions and recommendation of the Project and Programme Review Committee (PPRC), the Adaptation Fund Board decided to:

(a) Recognize the need for intersessional review of project and programme proposals by the secretariat and PPRC, and approval of proposals by the Board, in order that project and programme proponents continue to have the opportunity to present proposals at regular intervals; and

(b) Request the secretariat to prepare a revised options paper on the intersessional review and approval of project and programme proposals, including the process for such reviews and the types of proposals that could be reviewed intersessionally, for consideration by the PPRC at its fourteenth meeting.

(Decision B.22/15)

2. At its twenty-third meeting, the Adaptation Fund Board (the Board) discussed a recommendation made by the Project and Programme Review Committee (PPRC) of the Board, on arranging intersessional review of project and programme proposals. Having considered the comments and recommendation of the PPRC, the Board decided to:

(a) Arrange one intersessional project/programme review cycle annually, during an intersessional period of 24 weeks or more between two consecutive Board meetings, as outlined in document AFB/PPRC.14/13;

(b) While recognizing that any proposal can be submitted to regular meetings of the Board, require that all first submissions of concepts and fully-developed project/programme documents continue to be considered in regular meetings of the PPRC;

(c) Request the secretariat to review, during such intersessional review cycles, resubmissions of project/programme concepts and fully-developed project/programme documents submitted on time by proponents for consideration during such intersessional review cycles;

(d) Request the PPRC to consider intersessionally the technical review of such proposals as prepared by the secretariat and to make intersessional recommendations to the Board;

(e) Consider such intersessionally reviewed proposals for intersessional approval in accordance with the Rules of Procedure;

(f) Inform implementing entities and other stakeholders about the new arrangement by sending a letter to this effect, and make the calendar of upcoming regular and intersessional review cycles available on the Adaptation Fund website and arrange the first such cycle between the twenty-third and twenty-fourth meetings of the Board;

(g) Request the PPRC to defer to the next Board meeting any matters related to the competencies of the Ethics and Finance Committee that may come up during the

intersessional review of projects/programmes and to refrain from making a recommendation on such proposals until the relevant matters are addressed; and

(h) Request the secretariat to present, in the fifteenth meeting of the PPRC, and annually following each intersessional review cycle, an analysis of the intersessional review cycle.

(Decision B.23/15)

3. In the twenty-fifth Board meeting, the secretariat had requested to the Board to consider whether the rules in the intersessional project review cycle could be made more accommodating, with a view to speeding up the process. The Board subsequently decided to:

(a) Amend Decision B.23/15 and require that all first submissions of concepts under the two-step approval process and all first submissions of fully-developed project/programme documents under the one-step process continue to be considered in regular meetings of the Project and Programme Review Committee (PPRC);

(b) Request the secretariat to review, during its inter-sessional review cycles:

(i) First submissions of fully-developed project/programme documents for which the concepts had already been considered in regular meetings of the PPRC and subsequently endorsed by the Board;

(ii) Resubmissions of project/programme concepts and resubmissions of fully-developed project/programme documents;

(c) Request the PPRC to consider intersessionally the technical review of such proposals as prepared by the secretariat and to make intersessional recommendations to the Board;

(d) Consider such intersessionally reviewed proposals for intersessional approval in accordance with the Rules of Procedure; and

(e) Inform implementing entities and other stakeholders about the updated arrangement by sending a letter to this effect, and make effective such amendment as of the first day of the review cycle between the twenty-fifth and twenty-sixth meetings of the Board.

(Decision B.25/2)

4. At the thirty-fourth meeting of the Board, and the associated twenty-fifth meeting of the PPRC, a discussion took place considering a way for the discussion at the PPRC and Board to be streamlined in order to accommodate the growing number of proposals, which would no longer be possible to discuss during the normally-allotted time. The PPRC and the Board decided to prioritize the discussion of technically-recommended proposals, but asserted the wish to continue discussing the innovation, learning and scale-up grants.

5. Specifically, having considered document AFB/B.34/10, the Board decided to:

a) Request the Project and Programme Review Committee (PPRC) to pilot discussing technically-recommended pre-concepts, concepts and fully-developed project proposals

for concrete adaptation projects only, with the understanding that the Board members may request discussion at the PPRC meeting on any proposal that has not been technically recommended;

b) Request the PPRC to continue discussing innovation grants, project scale-up grants and learning grants, and other proposals from any new funding windows; and

c) Request the secretariat to prepare a document which contains options for further supporting the work of the PPRC and present it to the twenty-seventh meeting of the PPRC for consideration.

(Decision B.34/50)

6. In March 2020, due to the developments related to the global pandemic of COVID-19, the thirty-fifth meeting of the Board could not take place in a regular manner. Instead, the Board decided, [...] *on an exceptional basis, to change the dates of its thirty-fifth meeting and hold the meeting in two parts as follows:*

(a) The first part of the meeting to be held as a procedural virtual meeting on 2-3 April 2020, which will only address the matter of transition of officers for the next period of office, including chairs and vice-chairs of the Board, the Ethics and Finance Committee and Project and Programme Review Committee; and

(b) The second part of the meeting to be held in Bonn, Germany on 23-26 June 2020.

(Decision B.34-35/26)

7. The procedural meeting which took place, did not include the Board making decisions on any of the projects that had been submitted by implementing entities and technically reviewed by the secretariat for the consideration of the PPRC and, subsequently, Board.

8. Accordingly, the proposals that had been submitted and subsequently reviewed by the secretariat were left without decisions on April 3rd, the day when the thirty-fifth Board meeting had been originally scheduled to conclude.

9. Following consultation between the Chair and Vice-Chair of the Board and the PPRC as well as the secretariat, the chairpersons endorsed a plan to complete the remainder of the project/programme review cycle by following the pre-established steps normally taken under the intersessional review process. In other words, all eligible proposals would be redirected into an intersessional review process once the technical reviews have been completed by the secretariat and proceed as under a normal intersessional review process from that point onwards¹.

10. Accordingly, following the conclusion of the review cycle, which was renamed as the AFB35.a-35.b, 18 proposals were processed and the decisions taken on the affirmative non-objection basis, in what has been named the *intersessional period between the first and the*

¹ All the preceding steps of the review cycle are practically identical for the two types of review cycles (i.e. regular and intersessional.)

*second sessions of the thirty-fifth meeting of the Board.*² The information on the proposals and their decisions are available in Annex I.

11. In line with the Decisions B.25/2 and B.34/50, the proposals that were processed during the AFB35.a-35.b cycle did not include the first submissions of the concepts and fully-developed proposals, nor small grants for innovation and learning that had been submitted in advance of the anticipated thirty-fifth meeting of the Board. As a result, a number of the proposals that had been submitted and technically reviewed had remained without a Board decision. The information on the proposals that were not eligible for processing through the normal intersessional process is included in Annex II.

12. Furthermore, the secretariat accepted submissions in anticipation of the foreseen second part of the thirty-fifth meeting in June 2020 (as per Decision B.34-35/26) and coordinated the project review cycle in anticipation of a regular Board meeting. However, during early May 2020 it became evident that the second part could not take place as planned due to the ongoing pandemic and related travel restrictions. Therefore, following consultation with the Board Chair and Vice-Chair, the secretariat informed the Board, on 15 May 2020, that it would in due course communicate a proposed plan on meeting arrangements and interim modalities of work.

13. Given this sequence of events, there are, as at the date of this document, 27 technically reviewed projects that are pending PPRC recommendations to the Board and Board decisions. Of those, 14 are eligible and 13 are normally ineligible to be considered in an intersessional review cycle. The information on the proposals submitted in anticipation of the second part of the thirty-fifth Board meeting previously scheduled for June is available in Annex III, whereas the list of projects that are currently ineligible to be considered intersessionally is in Annex IV.

OVERVIEW OF THE PROPOSED *AD INTERIM* INTERSESSIONAL CYCLE

14. In light of the current and possible future disruptions due to the developments of the COVID-19 pandemic impacting the ability for the regular Board meetings to take place, and in spirit with the Decisions B.22/15, B.23/15, B.25/2 and B.34/50, an *Ad Interim* intersessional cycle is outlined further below. The purpose of the proposed *Ad Interim* project/programme intersessional review cycle is to allow for the project and programme proposals that are not eligible for inclusion in the normal intersessional review cycle to be processed fully, i.e. all the way to the decision by the Board. One of the main elements of the *ad interim* intersessional review cycle would be a virtual meeting of the PPRC, which would be organized as a combination of email-based review and commenting and a real-time session using videoconferencing and thus, allowing the members to discuss the aforementioned proposals, and finalize recommendations to the Board.

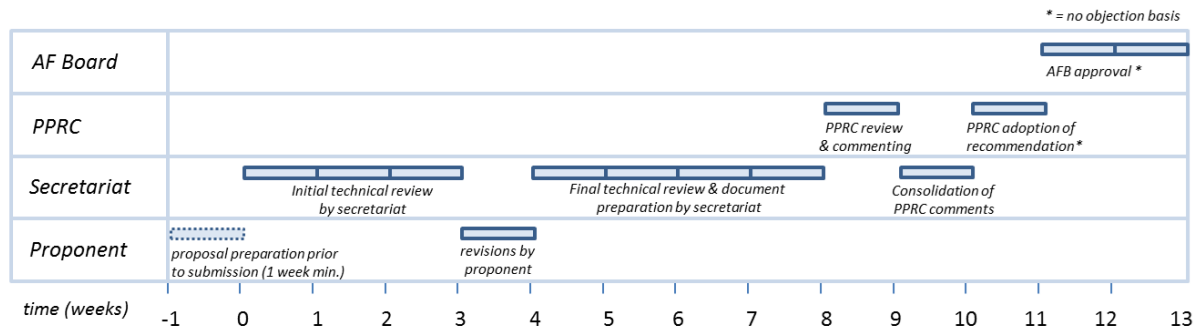

15. As for the proposals that are eligible for the normal intersessional review, as per Decision B.25/2, they can continue to be processed using the normal intersessional review process when Board meetings cannot be held in a regular fashion.

16. Recalling Document AFB.PPRC.14/13 “Options for Intersessional Review and Approval of Project and Programme Proposals”, the normal Intersessional Cycle can be presented (as in Fig.

² All the decisions are available on the Adaptation Fund’s website: <https://www.adaptation-fund.org/documents-publications/intersessional-decisions/>

1) as the following sequence of sub-processes, taken in turns by the Proponent, secretariat, PPRC and the Board:

Figure 1. Intersessional Project/Programme Review Cycle (Normal)

17. The intersessional cycle consists of the following steps:
- a submission period during which submissions are accepted by the secretariat;
 - three weeks of review by the secretariat, concluded by issuing a technical review report to the proponent;
 - one-week period for revisions by the proponent;
 - this is followed by normally four weeks of review and document preparation for the PPRC and Board, concluding by posting and circulating relevant documents for the review of the PPRC;
 - one week for the review and commenting of the PPRC;
 - another week for the consolidation of the comments of the PPRC by the secretariat. In the case of the *Ad Interim* intersessional cycle, a virtual meeting of the PPRC would also take place during this week;
 - this would be followed by one week of PPRC review and adoption of the recommendations, circulated to the Board by electronic mail;
 - two weeks during which the Board considers the recommendations and adopts them with affirmative non-objections from at least two-thirds of the Board members.

18. The *Ad Interim* intersessional cycle, as mentioned under (f), minimally differs from the normal intersessional cycle in one significant respect, which is that the PPRC would meet virtually via videoconferencing in order to enable the Committee members to have a real-time discussion on the proposals that would not normally be included in an intersessional review cycle (i.e. the small grants for innovation, learning and project scale-up as well as the first submissions of regular proposals). This would correspond to the stage associated with “Week Nine” of the intersessional process according to Fig. 1, when the consolidation of PPRC comments by the secretariat and the virtual meeting would be followed by the PPRC adoption of the recommendations. The secretariat would undertake efforts prior to the meeting to ensure access and participation of the members.

19. The PPRC members would be able to provide their comments on the projects ahead of the virtual PPRC meeting in a similar way as it is done with the normal intersessional review cycle. The form used for this purpose is included in Annex V.

RECOMMENDATION

20. Recalling its decision B.34-35/26, and recognizing the extraordinary circumstances and challenges due to the outbreak of the novel coronavirus Covid-19 which have prevented organization of face-to-face meetings of the Adaptation Fund Board (the Board) and its two committees, as well as the need for the Adaptation Fund to continue serving its mandate, the Board may want to:

(a) Take note of the fact that such proposals that were submitted to be considered at the second part of the thirty-fifth meeting of the Board, originally scheduled for 23-26 June 2020, and that are eligible for being considered intersessionally following decisions B.23/15 and B.25/2, are submitted for intersessional consideration by the Project and Programme Review Committee (PPRC); and

decide to:

(b) Organize an Ad Interim Review Process, as described in document AFB/B.35.a-35.b/15, in order to discuss and consider such proposals that have been submitted to be considered at the thirty-fifth meeting of the Board, originally scheduled for March 31st - April 3rd, 2020 and the second part of the thirty-fifth meeting of the Board, originally scheduled for 23-26 June 2020, and that are not eligible for being considered in accordance with the regular intersessional review process following decisions B.23/15 and B.25/2;

(c) As part of the Ad Interim Review Process referred to in subparagraph (b) above, organize a virtual meeting of the Project and Programme Review Committee in the week of August 24, 2020; and

(d) Consider, subject to specific decisions by the Board, using the above-mentioned process for future review cycles, in cases when the Board meeting cannot take place in a regular fashion.

Annex I: Project proposals processed through the normal intersessional review cycle between the first and second sessions of the thirty-fifth meeting of the Board (AFB35.a-35.b), First Round, submission deadline January 10, 2020
