# 1. CHALLENGES

---

- Difficulties to understand the scope of the learning grant
- It was unclear what kind of tools from the implementation of AF projects were included into the grant
- The amount was not that important regarding the ambition of what CSE wanted to put in place
  - Setting up the governance system for the CPDAE
  - Having a KM system for DA
  - Undertaking exchange visits at other african NIEs

## 2. ADVICES

- Propose a model which will have an impact at the regional level
- Keep communicating with the AF Secretariat to make sure that you are on the same page
- Try to identify existing tools from an initial project that can be scaled-up
- Prioritize the work with other NIEs that have experiences in programming, project implementation etc
- Provide more information on how activities financing will be maintained and sustained after project completion
- Clarified knowledge gaps and learning needs identified

# 3. RECOMMENDATIONS

---

- More clarification on the review criteria which are still not clear
- Develop a clear criteria table available on the AF website

# MERCI
