3. Asset Mix and Investment Income

ASSET MIX

The undisbursed cash balance of the AF Trust Fund is maintained in a commingled investment portfolio (“Pool”) for all trust funds managed by IBRD. Funds are managed such that the expected maximum loss, as measured by the CVaR, in the worst 1% of cases will not exceed 0.25% at the portfolio’s investment horizon.

The portfolio allocation by asset class has the largest allocations to government securities and money-market instruments.

INVESTMENT RETURNS

The AF Trust Fund liquid portfolio earned USD 41.26 million in investment income since inception. The portfolio returns during the first two quarters of calendar year 2022 was 0.06%, non-annualized.

*non-annualized

ESG SUMMARY REPORT – ADAPTATION FUND INVESTMENT PORTFOLIO

As per the investment management strategy implemented by the World Bank, the funds held in trust benefit from the approach to Sustainable and Responsible Investment (SRI), which considers and incorporates Environmental, Social, and Governance (ESG) factors into Trustee’s investment processes. The implementation of ESG Integration falls within the purview of existing authorizations by the World Bank Board. Based on the endorsement by the World Bank management, starting from July 2019, the Trustee has applied ESG Integration as the default SRI approach for all portfolios managed by the World Bank, including for the Adaptation Fund assets.

Considering and incorporating ESG factors into investment processes should, all things being equal, lead to portfolios that have stronger ESG profiles compared to portfolios that do not explicitly consider these ESG issues. ESG Integration has become part of the existing investment processes and is intended to help fulfil the existing investment objectives. The application of ESG Integration as part of the investment process would not involve any changes in the current investment objectives or risk limits for the Adaptation Fund portfolio.

The Adaptation Fund investment portfolio is primarily comprised of short-term high-grade fixed-income securities (sovereign, supranational and agency securities and bank deposits), and as of June 30, 2022, the portfolio has an ESG Quality Score* of 7.55 and an ESG Rating* of AA. Based on its ESG positioning in the MSCI ESG Fund Ratings Universe (upper right of Figure 1), which is deemed to be the more consistent reference indicator, Adaptation Fund’s investment portfolio falls in the top decile of the ratings universe. This reflects high capability of Adaptation Fund portfolio’s holdings in terms of managing key medium to long term risks and opportunities arising from Environmental, Social and Governance factors.

Figure 1: MSCI ESG Portfolio Summary – Adaptation Fund Trust Fund

**Note: ESG Quality Score is based on MSCI ESG Ratings and measured on a scale of 0 to 10 (worst to best) following a rule-based methodology. ESG Ratings Momentum represents the percentage of a portfolio's market value coming from holdings that have had an ESG Ratings upgrade, and those with a downgrade, since their previous ESG Rating assessment. The ESG Quality Score is calculated as a weighted average of ESG scores of individual holdings adjusted by ESG Ratings Momentum and ESG laggards (if any). The weight applied to the individual ESG scores is determined by the portfolio weight of individual holdings as of the reporting date. Based on the above, the ESG Quality Score, which is subject to potential skewing effect from any factor in the calculation, could slightly vary between different reporting dates along with changes in individual holdings and their portfolio weights as well as changes in ESG Ratings Momentum. Please see details on MSCI ESG Ratings Methodology [here](#).*
