What is the CPDAE?

A **global network** integrated by National Implementing Entities (NIEs) of the Adaptation Fund (AF) and Direct Access Entities (DAEs) of the Green Climate Fund (GCF), involved in the programming of climate change adaptation and mitigation finance through the **Direct Access Modality**.

Best practice approach to **enhance country ownership** of climate projects

Why the CPDAE?

In light of several challenges that NIEs and DAEs have been facing to **access climate finance**.

The idea originated from the entities themselves.

Acknowledging that sharing the challenges experienced and lessons learnt in the process of climate finance mobilization and implementation of climate change projects is key to **enhance the direct access modality**.

What is the **Purpose** of the CPDAE?

Provide an opportunity for **knowledge exchange, learning and experience sharing, collaboration and peer support** within the community (and at a global scale).

Increase the effectiveness of entities in accessing resources, programming those resources, and implementing adaptation and mitigation projects and programs through the **Direct Access Modality**.
