

Climate Finance: Accessing Climate Finance

Tuesday, 5 December
13.15 – 14.45
Climate Funds Pavilion, Thematic
Arena 3, COP28 Blue Zone

Today the need for collective, urgent, and ambitious action on climate is clearer than ever before. According to the UNFCCC's synthesis report of the technical dialogue of the first Global Stock-take, the world is not on track to meet the long-term goals of the Paris Agreement. While progress is observed in some areas, much more is needed now, on all fronts. We need to scale up and speed up the delivery of climate finance.

At COP26 the four multilateral climate funds (Adaptation Fund, Climate Investment Funds, Global Environment Facility and the Green Climate Fund) jointly committed to work together to accelerate the transition to a green, inclusive and resilient economy. This event brings together representatives from each of the funds to share details on how to access climate finance through the respective funds and share Insights Into the role that each play in delivering for climate action. Join us to learn more and meet our teams.

Audience: Open to all registered attendees with access to the Blue Zone.
