

- Environmental Management Agency- Zimbabwe
- Proposal title: Enhancing resilience of communities and ecosystems in the face of a changing climate in arid and semi-arid areas of Zimbabwe.

# Challenges faced

- Not yet implemented the project but challenges in project design;
- Covid pandemic- leading to delays in carrying out assessments, mode of communication
- Limited expertise-climate change project proposal development, development of policies
- Costs- capacity building by climate specialist and consultants
- Co-financing by EMA on ES&Gender Grant (\$25 000)-budget would have been approved and so delays in capacity building training

# Interventions and lessons learnt

ADAPTATION FUND

## Interventions

- Applied for technical assistance grant (ES&G)
- Engagement of consultants to assist in project design
- Budget for co financing in place
- Fostering of partnership with institutions

## Lessons learnt

- Technology advancement
- Capacity building is critical
- Collaboration with Government Institutions
